5 Days, Instructor-led hands-on

**Advanced BizTalk Server operations training that teaches you how to install, configure, deploy, and manage a BizTalk Server Environment.**

This five-day instructor-led course teaches advanced management techniques not covered in any other publicly available course. Students will learn to install, configure, deploy, monitor, and manage a BizTalk Server environment. This course also covers advanced topics with hands-on labs for multi-server installations, trading partner integration, and disaster recovery.

At the course completion, students will be able to:

- Describe the BizTalk message processing engine
- Identify BizTalk administration tools and tasks
- Install and configure BizTalk server in a multi-server environment
- Deploy applications using MSI packages
- Automate application deployment using scripts
- Configure hosts and host instances
- Configure and isolate services
- Deploy, manage, and monitor business rules
- Integrate with trading partners using EDI
- Track and debug services using Health and Activity Tracking
- Troubleshoot services using the Group Hub page
- Evaluate system performance using Performance Monitor
- Monitor BizTalk operations using SCOM 2007
- Backup and restore BizTalk databases
- Configure multiple MessageBox databases
- Develop a disaster recovery solution for a BizTalk environment
- Implement Enterprise Single Sign-On (ESSO)
- Enable Business Activity Monitoring (BAM)

### **Onsite Training**

Every one of our courses is available to be delivered on-site as a private class for your organization. The advantages of onsite training include:

- Save up to 60% of public class prices
- No student travel costs, you only pay the instructor's expenses
- Course topics can be customized to address your current business needs
- Focus on the business scenarios that match those of your organization
- Flexible scheduling and business hours
